At Mills-Peninsula Medical Center, we continue to marvel at the impact our donors, leadership, staff and volunteers have on the communities we serve. Each of you has shown a deep dedication to helping unleash our community’s generous spirit, turning inspiration into action. We salute everyone who helps us fulfill our mission of providing exceptional patient care. Here is a snapshot of some recent accomplishments that were made possible through generous philanthropic support.

### Mills-Peninsula Women’s Center

- **75,754** mammograms conducted from 2015 to 2017
- **91%** early-stage breast cancers detected at stage 0 or 1, well above national averages
- **278** 3D-guided biopsies performed with SAVI SCOUT wireless needle localization from August 2017 to August 2018

### Mobile Stroke Unit

- **1st** to launch in Northern California, and the only one nationwide operated by a community hospital
- **11 minutes** saved from ambulance dispatch to treatment, according to preliminary research
- **1.9 million** brain cells saved per minute

### ROBOTIC SURGERY

- **1,000 +** da Vinci surgical robot procedures performed by MPMC surgeons to date, prompting a new fundraising priority to acquire the next-gen da Vinci Xi

### Emergency Medicine

- **5.4%** rate of severe sepsis and sepsis shock death, a steep reduction since MPMC created a multidisciplinary team and adopted a rapid feedback model

### Community Philanthropy

- **$30 million+** donated by generous community members in 2018
- **3,572** gifts contributed from 2,389 households
- **$26 million** released for MPMC programs and technologies in the last 5 years

### Grants & Disbursements Program

- **$1.75 million** awarded in 2018 for 17 innovative projects to improve patient care
- **$30.5 million** total granted since the program’s inception
