

Get To Know Your Care Team

Nurse Practitioners | Physician Assistants

Advanced practice clinicians (APC) are here to support your health in a thousand ways, big and small. These healthcare providers, made up of nurse practitioners (NP) and physician assistants (PA), are specially trained to offer timely, personalized care to help you feel your best.

By scheduling a visit with an NP or PA, you have access to:

- Trusted partners on your care team that can stand in for your doctor when needed.
- Clinicians with high patient satisfaction.
- Earlier appointments with decreased wait times.
- High-quality, affordable care.
- Longer appointment times, if needed.

What care can NPs and PAs provide?	NP	PA
Develop and manage treatment plans.		
Diagnose illness and injury.		
Educate patients on disease management and prevention.		
Manage overall care.		
Order and interpret labs, diagnostic tests and screenings.		
Perform procedures.		
Prescribe and administer medications.		
Serve as the primary provider for patients.		
Take medical histories and perform physical examinations.		

How do NPs and PAs prepare for their roles?	NP	PA
Hold master's-degree level and in some cases, hold a doctoral degree.		
Classroom instruction in basic and advanced medical sciences.		
At least 700 hours of supervised clinical practice, with 800+ additional clinical hours during RN license preparation.		
At least 2,000 hours of supervised clinical practice.
