Available Programs

- **Sutter Weigh for Life Program**

Throughout this course, you'll learn how behavior changes, healthy eating and being active can help you control your weight. You'll attend weekly sessions for eight weeks, with the option to extend.

- **Meal-Replacement Program**

With lifestyle-change classes and medical management, you'll adjust your diet to consist of shakes, bars or soups. It lasts about six months and can be extended.

- **Pharmacological Weight Loss Program**

This program combines medications, behavior-change classes and medical management. It lasts about four months and can be extended.

- **Weight Loss Surgery Program**

This six- to 12-month program guides you on your weight loss journey before surgery (depending on individual needs and insurance coverage). After surgery, you'll be enrolled in our one-year post-op program for ongoing support.

Congratulations on deciding to explore how you can achieve better health by watching the "Your Options, Your Choice" patient education video. Here's a summary of the various weight management programs the video described. If you're not sure which program might fit your lifestyle, budget and health needs, schedule an appointment to speak with one of the providers on our weight management team. They'll review your medical history, discuss risks and benefits and guide you to the tools and programs most likely to help you reach your health goals.

Next Steps

We look forward to speaking with you and having you join one of our programs. To get started, call us at **877-899-8766 or 916-774-8885**.

Surgical Team

You'll be in good hands when choosing Sutter Roseville Medical Center for bariatric surgery. The highly trained surgeons are supported by a team of medical providers and registered dietitians. We're accredited as an American College of Surgeons Comprehensive Center for Metabolic and Bariatric Surgery Program – the gold standard for bariatric surgery programs in the U.S. The surgical staff routinely perform initial bariatric surgery and complex revision procedures using both laparoscopic and robotic techniques. Procedures include:

- Sleeve gastrectomy.
- Gastric bypass.
- Traditional duodenal switch.
- SIPS (loop duodenal switch/SADI).
- Vertical banded gastroplasty revision.
- Lap band removal.
- Conversion to other bariatric surgery and gastric bypass revisions.
