

Why Choose an Outpatient Surgery Center?

Many surgical procedures that used to require long hospital stays and recovery periods can now be done on an outpatient basis with shorter, less painful recovery times. Since 1991, Sutter Auburn Surgery Center has provided safe, high-quality surgery services in a comfortable and family-friendly setting.

Our state-of-the-art facility offers care in a convenient location with predictable scheduling options. In addition, we are accredited by the Accreditation Association for Ambulatory Health Care for providing quality care and excellent patient safety services.

Specialties at the Center

Prior Notifications

You will be given verbal and written information prior to your procedure, including documents about:

- Patient Rights and Responsibilities
- Notice of Privacy
- Physician Ownership Disclosure
- Policy on Advance Directives

A few days before your procedure, you will receive a phone call from our staff to evaluate your readiness and give you instructions for your procedure.

Anesthesia

- Anesthesia is used to relieve pain and sensation during surgery. There are five types of anesthesia used in our various outpatient settings, including general, regional, IV sedation, local and topical. Before the procedure, you will be given an intravenous sedative or medication to relax you and make you comfortable during the procedure. Your doctor or your anesthesiologist will explain and determine the type of sedation or anesthesia best suited for you and your procedure.

One to Two Weeks Before Your Procedure

- You may be asked to stop blood thinning medications and nonsteroidal anti-inflammatory drugs (NSAIDs). Check with your primary care or prescribing physician about how long you should avoid these medications prior to your procedure. You may be advised to stop vitamins and herbal supplements as well. It is important to tell your doctor if you are taking any medications, vitamins and herbal supplements.
- Tell your doctor if you experience any changes in your physical condition, such as having cold, fever or flu-like symptoms or any cuts, scrapes or rashes near the procedure site.

Day Before Your Procedure

- Do not drink alcohol as this may affect your procedure.
- Ask a responsible adult companion (a friend or a family member) to drive you to and from the facility and stay with you after you return home. You will NOT be permitted to leave the facility unaccompanied or alone in a taxi. We will be forced to postpone your procedure if you do not have a responsible adult companion with you.
- If you are the guardian or caregiver of a minor or you have a power of attorney for the patient, you must bring a copy of the paperwork showing legal verification with you.
- Confirm date and arrival time for your procedure. A surgery center staff member will call you a few days before your procedure to inform you of the date, time of procedure and required arrival time to our center. The time of arrival is subject to change due to unforeseen circumstances.

Night Before Your Procedure

- **Food or Drink:** From midnight to the time of your procedure, you should refrain from eating or drinking unless you have been instructed differently by the surgery center staff. **Be sure to follow restrictions on liquids and special instructions given to you.**

Morning of Your Procedure

- **Medications:** Take medication for your heart or blood pressure with one sip of water on the morning of your procedure. If you take insulin or oral diabetic medication, please follow your physician's instructions.
- If you use inhalers, CPAP or insulin, you may be instructed to bring them with you to the center.
- Remove all jewelry, body piercings and metal hair clips.

- **Personal Belongings:** Don't bring valuables with you, including laptops, cell phones or other expensive items.
- **Personal Care for All Procedures Except Colonoscopies:** Remove all nail polish and makeup. Shower and wash your hair. Do not shave operative site, use perfumes, deodorant or lotions. Do not mark the procedural or nonoperative site in any way. Your surgeon will mark the site if necessary. Wear comfortable, loose fitting clothing, such as pants with an elastic waistband and a button-up shirt. Bring a zippered or buttoned jacket or sweater with you if you like. Wear secure footwear such as sneakers or rubber-soled flat shoes.
- Bring a list of all medications and supplements you are currently taking. Be sure to write the name, dose, how often and reason for taking, and the name of the doctor if it is a prescribed medication.
- Bring your insurance card, photo identification, copayment and advance directives (if you have one) with you.
- Have your responsible adult companion drive you to the surgery center.
- If the patient is a child, the parent, guardian or surrogate is required to stay at the center during the procedure and until the child is ready to be sent home. Please bring a favorite toy or blanket.

After Your Procedure

- You will be monitored and cared for by our Post Anesthesia Care Unit (PACU) nurses immediately after your procedure. Recovery occurs in the PACU.
- Your recovery time will vary depending on your procedure and type of anesthesia used. You will be discharged from the center once your doctor determines that it's safe for you to go home.

- You and your responsible adult companion or care provider will be given written home care instructions and taught how to care for you and the area treated. Overnight supplies for dressing changes will be sent home with you, if needed.
- Please follow the restrictions ordered by your doctor while you are recovering at home. Depending on your procedure, some of these restrictions may include avoiding strenuous physical activities, drinking alcoholic beverages, operating machinery, driving a car or making important decisions.
- Our nurse will call you the day after your procedure to check on your progress.
- Contact your doctor if you experience severe pain or complications requiring immediate attention following your procedure.
- If you have any reason to think you need urgent help, call 911 or go the nearest emergency room.

Payment

The center will verify your benefits and obtain authorization prior to your procedure. You will be notified of your financial responsibility for the facility fee prior to your scheduled procedure date. Payment for your services at the surgery center are due the day of your procedure. Cash, check and credit cards are accepted. If you anticipate difficulty with your bill, please let us know before your procedure so we can work together to establish a fair solution. Your bill may also include surgeon fees or fees for services such as anesthesia, pathology or laboratory work, depending on your procedure. Check with your medical insurance provider to determine what's covered by your plan.
